

St. Mary's School, SF

STEM PROGRAM: K - 8th GRADE SCHOOL

Innovative Thinkers.
World Citizens.

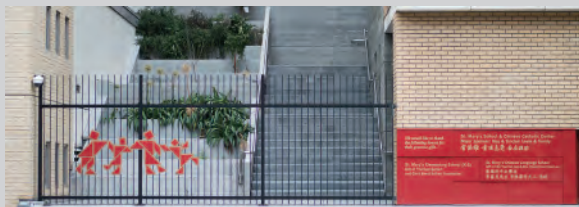

A Link to the Future.

WELCOME

St. Mary's School is the perfect environment for your child to become an innovative thinker, active learner, and compassionate citizen of this ever-changing world. This is accomplished through the implementation of a rigorous curriculum that challenges young minds to develop basic skills and then use those skills for practice in everyday life. We also pride ourselves in educating the whole child (mind and soul) for their lives in the 21st Century.

St. Mary's School, SF Quality Education Since 1921

- * STEM (Science, Technology, Engineering, Math)
- * MANDARIN LANGUAGE CLASSES

OUR MISSION

It is the mission of St. Mary's School to nurture and develop lifelong learners who collaborate with peers, strive to improve in their own learning, and serve their communities with Catholic values, respect, and charity. In addition, it is the mission of this parochial school to build an understanding of the Catholic faith through the guidance of the Paulist Fathers.

OUR FOUNDATION

Rigorous Academic Standards

We are a STEM school, which develops young minds in the fields of science, math, and engineering. As we are part of a proud Asian heritage and tradition, we have integrated a Chinese (Mandarin) language and cultural appreciation program into our daily studies. The rigor is further developed through our physical education, art, and music programs.

Technology

Our school prepares students for 21st Century education by teaching students to use technology as a means of presentation, a path to skill improvement, and as an essential research tool. Technology integration includes the use of SMART boards, internet-based instruction, and a BYOD,3rd to 8th (Bring Your Own Devise) policy.

Collaboration & Compassion

We believe that students are well educated when they are challenged and share their abilities with others. Rooted in the Catholic tradition, we educate our students to be respectful of all traditions, to all individuals, and to understand they are members of a global community.
